

# Owl Wall - Echo Bay Revelstoke

## 22 Baby Bear

11b | Mixed | 23m | 8 Bolts

Established & FA: Douglas Sproul. October, 2017.

An easy start leads to a sweet 5.6 finger crack that takes bomber gear. This leads into the first overhang and the crux which is between the first and third bolts. Step off the bulge and into the corner, following it to the top through one more difficult section and some really sweet corner climbing.

Remember to check out the river view from the top, it's epic! Although this is a mixed climb, the bottom gear section is very easy climbing and the upper corner system is stellar so, it's the hope of the author that this pitch will not be as overlooked as so many of the other mixed climbs in Revelstoke. Take a few pieces of gear to .75/1".

## 23 Birthday Crack

5.8+ | Gear | 25m

Established & FA: David Sproule & Greg Hill. June, 2017.

David has plans to finish the cleaning on this route next season but it's climbable now and is an enjoyable 5.8 with a sweet view of the river and valley. Shares a start with Baby Bear and follows the obvious crack in the largest corner. The anchor is just above the top of the pinnacle.

Gear to 4". Double #3 and #4 recommended.
